

## On to Ottawa

By WALTER MOSELEY  
(Train No. 1)

When we climbed on board Ottawa-bound Train No. 1, at Regina on the morning of March 23, we didn't know what to expect, but it was soon evident that we had expected to see a bunch of "hoozies" and had even regretted. When the train got rolling, and we picked up all the delegates from across Regina and Winnipeg. There were 266 delegates aboard. Of the number, all were male but 26. There were six women delegates from Alberta, two from Saskatchewan, and eight from Manitoba. Most delegates were dark haired, middle-aged men, and were nearly a sprig of "ten gallop" hats which one might expect to see amongst a delegation of this nature. The total delegation consisted of 1,148 delegates, travelling in four special trains, two out of Regina and two out of Saskatoon.

Whoever was responsible for the arrangements had looked after every detail: shipment of bottles, meals, picture shows to help pass away the time, etc. (The "hoozie" delegates' a mimeographed news sheet, made its appearance twice daily to keep the delegates entertained on happenings aboard the train and to create an "inside" group. Church services were held on Sunday with Protestant and Catholic ministers officiating.

Everyone was keenly conscious of the responsibility he or she had accepted as a member of this delegation to Ottawa. Groups of farmers gathered in the smoking cars or just congregated around their berths to discuss the brief which they were to present to Prime Minister Diefenbaker and his cabinet ministers. Evidence of the sense of responsibility felt by members of the delegation was indicated when the Dominion failed to stop at Champlin to pick up delegate C. T. Bryant, when he disappeared in the distance. Mr. Bryant had come, jumped into his car and attempted to catch the train at Gulf Lake, but arrived just in time to see the train disappear in the darkness. Undisturbed, Mr. Bryant

## Spring offers wool fashions for everyone

It looks like a wonderful season in Canadian fashion—so much variety and something becoming for everyone.

The high-waisted look with a slender bust fit continues to be the strongest influence in fashion. But the return to the natural waistline, often echoed by a wide belt, is on its way.

In dress there is usually the suggestion of a high waist, sometimes with a drawstring belt, wide-shape neck, or simulated bolero. These styles look particularly fresh in crisp checked woad or light spring wool—often with a note of the same material.

In suits the most important jacket is short, just avoiding the waistline in length and fit — and perfect in fit-checks. Continuing in high fashion is the colorless

and turned his car toward Swift Current, where he finally caught up with the train.

In haste to Ottawa a delegate was chosen from each car as a candidate for the "meeting committee." After the train reached a steering committee was chosen from those candidates.

Train No. 1 arrived in Ottawa on Monday morning. Much to the astonishment and dismay of the farmers, they were met by a band of House Argue for the CCF party supporters, with large banners proclaiming the support of the CCF. Every attempt had been made by the delegates to keep the march on a non-political basis and it was feared that the welcome given by the CCF might be wrongly interpreted.

Early in the afternoon, after delegates had been comfortably settled in hotels, a meeting was held in the hall of the Ottawa Leader where most of them got their first look at the official brief. Mr. J. H. Wesson, president of the Saskatchewan Wheat Pool, was the speaker.

One or two minor changes were made, and the brief turned over to the printers. After the meeting adjourned, delegates took no time in looking out their constituency members and pressing their cases. On Wednesday morning the brief was presented to Prime Minister Diefenbaker and his cabinet members by Mr. J. H. Wesson. Also present were 148 members of parliament and senators, plus members from the Ontario Farmers Union, and representatives of the press, radio and TV, besides all the western delegates. Following Mr. Wesson's reading of the brief, a number of representatives were given by radio delegates representing people from all walks of life.

In his reply to the brief, Mr. Diefenbaker said the government did not have a closed mind on the issue, but would make a continuing study of the problem. Delegates left the hall satisfied that the Prime Minister would give the matter his attention. None had really expected an im-

mediate answer to their brief, and were satisfied to give Mr. Diefenbaker an opportunity to study it before taking any action. However, they did not come to Ottawa in sight, and the 1,148 delegates spent the remainder of the time at their disposal in visiting out cabinet members, senators and members of parliament in an effort to make everyone conscious of the problems of the western farmer.

On Wednesday morning a number of western M.P.'s hosted their constituents at breakfast in the Parliament Buildings, giving the delegates a better opportunity to discuss their problems. All through the remainder of the day farmers could be seen in groups, or singly, talking to anyone who would listen to them. The episode gathered by delegates was that eastern members of parliament were more sympathetic to their cause than were western M.P.'s. Most delegates reported receiving sympathetic encouragement from citizens encountered on the streets and in the shops of Ottawa. Before reaching the trains to return to their homes in the west, the delegates were the guests of the western M.P.'s at a reception in the Parliament Buildings.

The trip home was without incident. The boys were tired from traveling the corridors of the Parliament Buildings, and were content to rest, enjoy a quiet glass of bridge or cribbage while the train rolled westward. Stephen Hanes of London, Sask., will remember the trip fast as a while. He stepped out on the platform of the last coach on the train for a breath of fresh air. He got several breaths. The door slammed shut behind him and he was locked out in the cold in his shirt-tail.

DEEP BREATHING  
Canadians trying to reduce should add deep breathing to the program. Greater oxygen intake burns off waste fats, helps reduce pounds.

## Manitobans swap dingy dives for new dine, dance drinkeries

Before July 1956, Manitobans could say legal liquor from only 20 outlets scattered around the province. These outlets were limited to beer stalls in dingy beer parlors, women had to drink in hotel rooms, packed cars or at home. Now Manitoba has 135 in-house, cocktail bars, beverage parlors, and night clubs and restaurants licensed to sell beer and wine.

## Manitoba gets four new oil wells in January

Four new oil wells were brought in during January in Manitoba's oil fields, bringing the total number of wells capable of production to 81. Hon. Garney Davis, minister of mines and natural resources, announced the report in December of 1958 there were 730 wells in production. The cumulative crude oil production to January 31, 1959, was 25,363,777 barrels. In January the production was 422,368 barrels. This compares to 445,038 barrels produced in December, 1958. The average daily production in January was 13,943 barrels. There were 730 wells out production in January, 1959, was 5,529,228 barrels.

LOOK, LOOK, WHAT I'VE GOT!  
Eugene Baskinberg, Jackfish, brought an egg into the News-Ottawa office that was 1/2 of an inch long and weighed less than 1/2 ounce. It was from a Light-Side, Susan, Man. — The News-Ottawa, North Battleford, Sask.

## More jobs available for U. of S. students on campus

The University of Saskatchewan in Saskatoon is making a special effort to find summer employment for the students of the University of Saskatchewan as possible this year.

After the summer break from the National Employment Service that students will have much more difficulty than before in finding employment, the University's Personnel Office has contacted the departments to find out the number of positions open on the campus that more students will be placed there last year when about 50 students found work on the campus rather than in laboratories and research.

Personnel Manager J. W. Joyce said that the university will employ available student help wherever possible either on a full time or part time basis. In the last two years it has become necessary to add as many as 100 to the staff.

Mr. Joyce says union employees previously held off after seasonal work will not be affected by the plan. They will still have their rights protected.

Mr. Joyce's office and the university branch of the National Employment Service under W. Pender are maintaining lists of university jobs available. Students other than those who make their own arrangements through departments for academic work may apply at either office.

Mr. Pender said any student wanting a particular type of job on the campus should not hesitate to ask about it as a check can be made on file to be available.

Hundreds of students will get work outside the university. The 1958 office has received about 1,300 applications for jobs.

## Merit rating study for teachers set up

How Stewart E. McLean, minister of education, said that a special committee, set up to study merit rating for teachers, will meet again on the 10th of March to discuss the study.

The big change in Manitoba's drinking habits came in 1956 when the new Manitoba Liquor Control Act was put into effect. Garner reported.

The act was drawn up on the recommendation of a Provincial Government Commission, which was the most extensive study of alcohol sale and consumption ever made in Canada.

One unique feature of the Act is the licensing of drugstores and other traders to sell beer and wine in communities too small to support a government liquor store.

In one community, a Massey-Ferguson dealer is licensed; in another, an electric supply shop; in Winnipeg Police Chief Robert T. "Tom" Cullen the change has been made the Manitoba act says.

There has definitely been a decrease in major liquor offences. Borelgraves are a vanishing race. Now, our drinks are mostly regulars.

When the Act was recommended, "temperance" leaders preached that the act was a necessary step toward abolishing prohibition, promiscuity and illegitimacy. Today, however, Rev. William Porteous, executive director of Manitoba Temperance Association, said that the act was a necessary and helpful change. But we shouldn't forget we're dealing with beverage alcohol which is social.

—The News Magazine, Ansonia, Conn.

WHAT A STATEMENT  
A statement which would be of interest to many oldtimers of the district was turned in to us by George Humphreys recently. It is a statement of H. Robertson (R. A. Robertson's father) General Blacksmith of Cammington Manor, W.T. dated December 26, 1888. The account was made out to Mr. W. Bradford and some of the entries are: "We were holding out of farming mill, etc.; Repairing school, etc.; Sharpening blades, etc."

Charge like these would have been made in 1899-1900. The Observer, Carlyle, Sask.

For dry, arrow-narrow sheath for darts, a romantic overcoat made of breezy chiffon or voile. Off-see — choose slanting, cut-on or silk for dress.

Printed Pattern 4790: Jr. Miss sizes 9, 11, 13, 15, 17. Size 13 dress takes 2 1/2 yards; 10-16 dress, creased 3 1/2 yards.

Printed directions on each pattern part. Back, accurate.

Send forty cents (40c) in coins (change cannot be accepted) for this pattern. Please print plainly name, address, style number.

## Reduced royalties to benefit trapper

Ministry's preference for mink has brought about a 50 per cent reduction in provincial royalty on beaver pelts.

Minister of Natural Resources, announced that the royalty drop from \$3.00 to 50 cents was only aimed by order-in-council.

Minister's move is designed to allow trappers a greater margin of profit.

Mr. Evans said that 10 per cent of selling price is considered a fair royalty. It is roughly estimated that beaver pelts will bring the trapper between \$2 and \$3 this winter. Kila, young beaver men, are taking the bait.

Some 30,000 beaver were taken in Manitoba in 1957. However, as both Winnipeg and St. James report surpluses of beaver, the minister added that high water conditions in recent years have reached in a large increase in beaver population in Western Canada and Ontario.

While the popularity of beaver has changed, wild mink are scarce. This increased demand for good prices. Trappers in Manitoba are expected to report a record net figure on record. A comparative net figure on record. A comparative net figure on record.

Mr. Evans said that the Alberta government recently made a decision on an order-in-council. There is no indication, at the present time, that either Saskatchewan or Manitoba will reduce their royalties.

## Wawota breeder takes bull championship

A junior yearling hereford bull owned by J. L. Lorrance, Wawota, captured a grand championship of the Royal Winter Fair recently. The bull, named "Wawota," is exhibiting at the fair for the first time.

Wawota, a son of the famous animal, Perfect Mixer Star, placed first in the bull class. In fact, the breeder's junior championship went on to take the coveted grand championship.

In a class for two-year-old bulls, Wawota, a son of the famous animal, Perfect Mixer Star, placed first in the bull class. In fact, the breeder's junior championship went on to take the coveted grand championship.

Changes of advertising matter should be sent in at least two weeks from each Tuesday to insure insertion in the following issue.

**CNR FIREMEN'S UNION**

A letter regarding CNR is "definite possibility," says Mr. W. E. Gamble, Canadian head of the US based Firemen's Union. Mr. Gamble's statement followed the finding of the Federal Conciliation Board in the union's dispute with the CNR that firemen are not needed on freight and yard diesel.

Canadians believed the so-called diesel fireman dispute had been settled once and for all by the findings of the Kellogg Royal Commission. That body of three high court judges, after the most exhaustive inquiry in Canadian labor history, found that firemen were not needed on freight and yard diesel.

The CNR should reach the same conclusions.

If the Firemen's union goes on strike against the CNR in an attempt to force the publicly-owned railway to hire new men for jobs which have become redundant, it will be the most unpopulous strike in the history of Canadian labor relations. It is hard to imagine what Mr. Gamble, and his union colleagues in Cleveland, Ohio, hope to gain by such irresponsible talk. The Canadian public has already been exposed to the inconvenience of two strikes against the Firemen's union against the CNR. That same Canadian public will certainly not tolerate a third strike on the same issue against the CNR.

**NEW POLITICAL PARTY**

Canadian Labor Congress doesn't seem to be making much headway in efforts to lure Western farmers to support new left-wing political party which it proposes to launch with CCF help. This is clear from reports from Winnipeg, where a CCF party conference on the proposed CCF-CLC merger announced that farmers will join the new party as individuals. The announcement suggests that farm organizations in the Prairies have scant enthusiasm for what, in effect, would be a labor-dominated socialist party run by a few bigwigs of the Canadian Labor Congress.

## Local & District

Two rinks from Delia, one consisting of Lester Bittel, Bert Marshall, Hardie Friedman and Henry Watson, and another consisting of Doug Morrison, Bob Gibson, Henry Larkin and Joe Meyers, entered a bonspiel in Calgary last week. D. Morrison rink won second in the 2nd event.

Mr. and Mrs. Ben Mammel were week end visitors in Champion, where they visited relatives.

Miss Marilyn Lowe and Ralph Morrison, accompanied by Bill Bridges and Dennis Williams, were second in the Amateur Show in Drumheller last Friday evening. The prize was \$15.00.

As will be seen by Advt. Bert Marshall (next to the Times Office) has been appointed agent for U. F. Co-operative Ltd. top quality Maple Leaf gasoline, oils and greases in Delia and district. Phone 399 for prompt service.

Messrs J. A. Carter and Wilkie Sharpe, of Calgary, were motor visitors in Delia Wednesday, and attended the R. M. Milne auction sale. Incidentally Mr. Carter was looking after his business interests here and renewing old acquaintances.

Dr. W. L. Carter is patient in the Drumheller Hospital, with an attack of pneumonia. He is expected to leave the hospital in a few days.

There was a break in the dry weather early Wednesday morning when it snowed heavily, later turning to rain, and remained cloudy and threatening throughout the day. Temperatures are in the low 50's.

## Minutes M.D. Council of Starland, No. 47

(Continued from Front Page)

Isenor, Rimmer; John Holzer, Ramsey.

**HOW FERTILIZER BOOSTS YOUR PROFIT ON BARLEY**

**YOU CAN MAKE UP TO \$9.00 PER ACRE MORE!**

Actual field tests show how your net profit per acre of summer-fall barley is boosted by the use of Elephant Brand Fertilizer.

In the table below, note that the increased profit figure takes the cost of fertilizer into consideration. An increased profit of over \$9.00 per acre is certainly worthwhile.

|                                   |                                |
|-----------------------------------|--------------------------------|
| Fertilizer per acre               | 50 lb. 11-48-0 (Cost \$2.70) * |
| Increased yield per acre          | 16 bu. (worth \$12.00)         |
| YOUR INCREASED PROFIT PER ACRE    | \$9.30                         |
| OR \$93.00 ON 100 ACRES OF BARLEY |                                |

\* Fertilizer cost figures per acre are approximate.

When properly fertilized, barley grown on stubble land will show an equally profitable return per acre. For greater net profits per acre than from any crop on any soil, contact your Elephant Brand dealer listed below for the right information.

It pays to use
